

laravel5/laravel6laravel8[

- config/app.php
- bootstrap/app.php

Problem 1

- laravel/ui[v4.2.0, ..., 4.x-dev] require illuminate/console ^9.21|^10.0 -> found illuminate/console[v9.21.0, ..., 9.x-dev, v10.0.0, ..., 10.x-dev] but these were not loaded, likely because it conflicts with another require.
- Root composer.json requires laravel/ui ^4.2 -> satisfiable by laravel/ui[v4.2.0, ..., 4.x-dev].
